BUY TOOLS

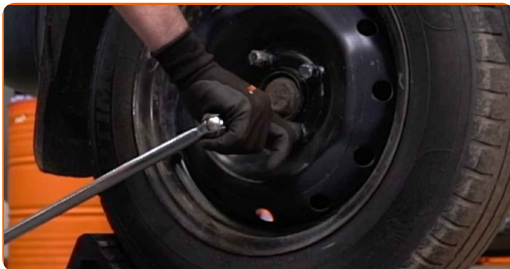

AUTODOC recommends:

- Do not re-use the bearing assembly of your Citroën Berlingo M car.
- The wheel hub bearing replacement procedure is identical for both wheels on the same axle.
- Please note: all work on the car – Citroën Berlingo M – should be done with the engine switched off.

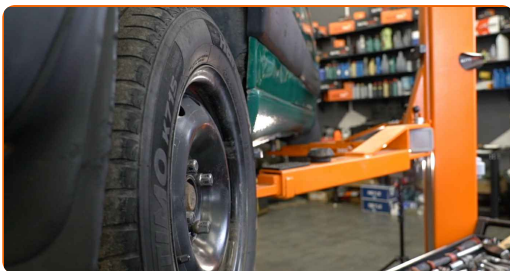

CARRY OUT REPLACEMENT IN THE FOLLOWING ORDER:

1 Secure the wheels with chocks.

2 Loosen the wheel mounting bolts. Use wheel impact socket #19.

3 Raise the car.

Replacement: wheel bearing – Citroën Berlingo M. AUTODOC recommends:

- If you are using a jack, make sure it rests on a flat surface without any unevenness.
- Be sure to additionally secure the car with jack stands.

4

Unscrew the wheel bolts.

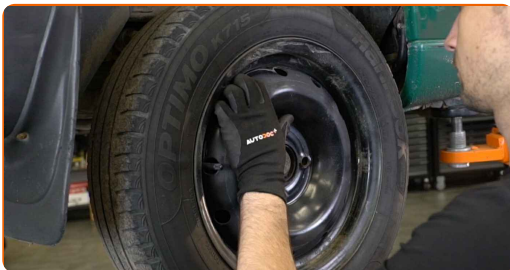

AUTODOC recommends:

- Warning! To avoid injury, hold the wheel while unscrewing the fastening bolts.
Citroën Berlingo M

5

Remove the wheel.

6

Clean the brake drum fasteners. Use a wire brush. Use WD-40 spray.

7

Unscrew the brake drum fasteners. Use Torx T30. Use an impact screwdriver.

8

Remove the fastening bolts.

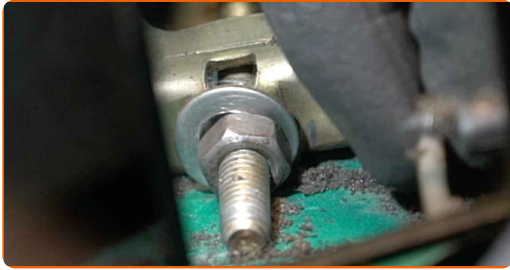

9

Unscrew the fasteners of the centre console and remove it. Use a Phillips screwdriver.

- 10** Loosen the parking brake cable adjustment nut. Use a drive socket #12. Use a ratchet wrench.

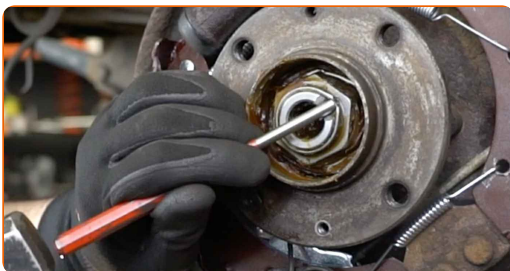

- 11** Remove the brake drum. Use a crowbar.

- 12** Remove the hub bearing protection cap. Use a crowbar. Use a hammer.

- 13** Unstake the axle nut. Use a pin punch. Use a hammer.

14

Unscrew the hub bearing fasteners. Use a drive socket #41. Use a tap wrench.

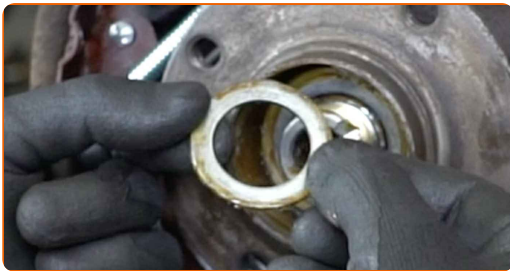

15

Remove the fastening nut.

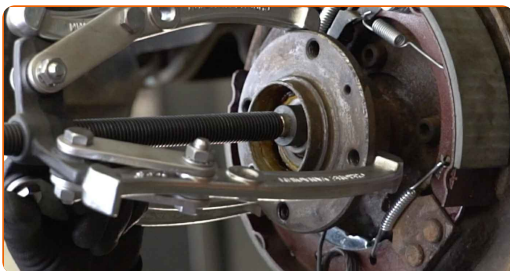

16

Remove the wheel bearing washer.

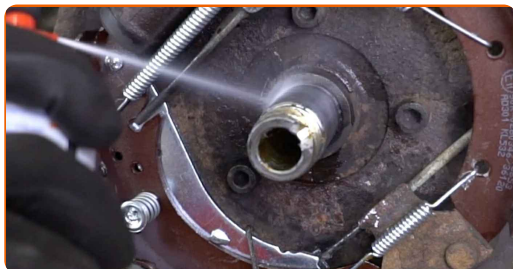

17

Remove the wheel hub together with the bearing. Use 3-Arm Gear Puller.

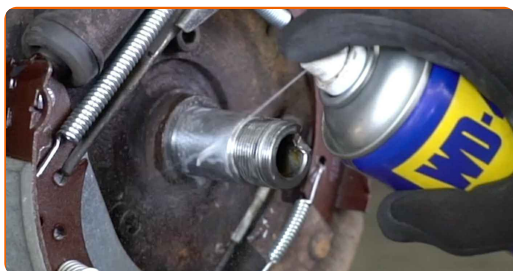

18

Clean the hub bearing mounting seat. Use a wire brush. Use all-purpose cleaning spray.

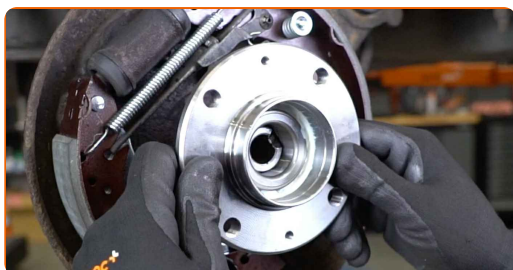

19

Treat the wheel bearing mounting seat. Use WD-40 spray.

20

Install the new wheel hub together with the bearing.

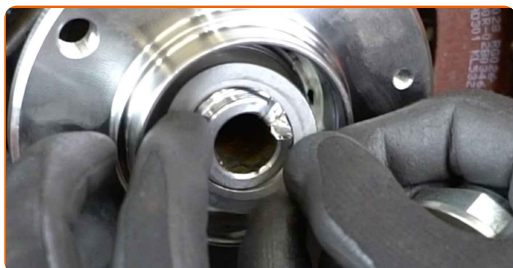

21

Push the hub in until it stops. Use a bush and bearing driver set. Use a hammer.

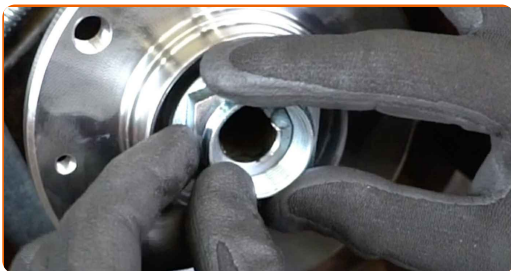

22

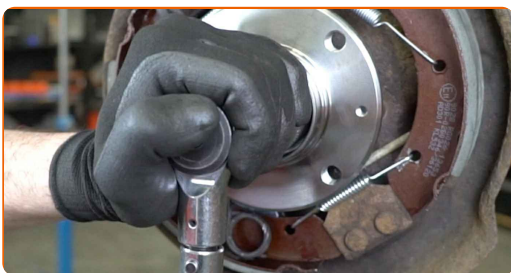

Fit the wheel bearing washer.

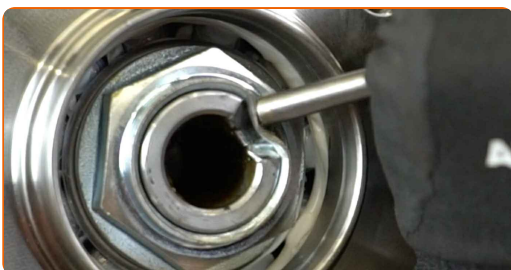

23 Install the fastening nut.

24 Tighten the hub fastener. Use a drive socket #41. Use a torque wrench. Tighten it to 275 Nm torque.

25 Restake the wheel hub retaining nut. Use a pin punch. Use a hammer.

26 Install the hub bearing protection cap. Use a bush and bearing driver set. Use a hammer.

27

Treat the wheel hub in the area where it contacts the brake drum. Use ceramic grease.

28

Install a brake drum.

29

Install the fastening bolts.

30

Tighten the brake drum fasteners. Use Torx T30. Use a torque wrench. Tighten it to 10 Nm torque.

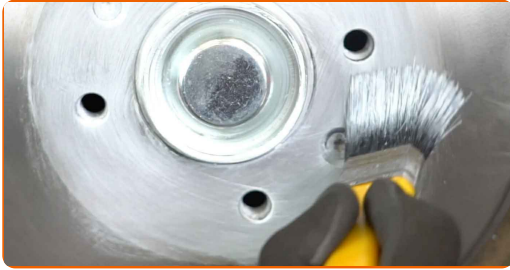

31

Clean the wheel rim mounting seat. Use a wire brush.

32

Treat the surface where the wheel rim contacts the brake drum. Use ceramic grease.

33

Install the wheel.

AUTODOC recommends:

- Warning! To avoid injury, hold the wheel while screwing in the fastening bolts on the car. Citroën Berlingo M

34

Screw in the wheel bolts. Use wheel impact socket #19.

Replacement: wheel bearing – Citroën Berlingo M. Professionals recommend:

- Without starting the engine, press the brake pedal several times until you feel significant resistance.

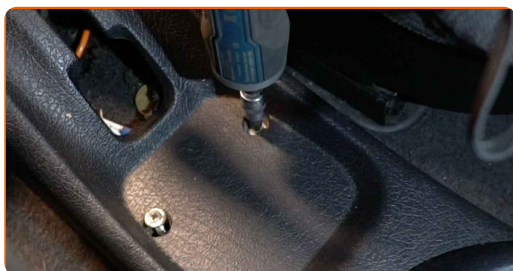

35

Adjust the parking brake cable adjustment nut. Use a drive socket #12. Use a ratchet wrench.

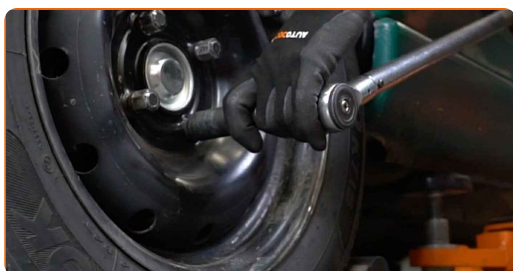

36

Install the centre console and screw in its fasteners. Use a Phillips screwdriver.

37

Lower the car and working in a cross order, tighten the wheel bolts. Use wheel impact socket #19. Use a torque wrench. Tighten it to 90 Nm torque.

38

Remove the jacks and chocks.

WELL DONE!
